Work Experience

❖ Full stack developer | BIOAMAZ- Peru

(April'23- Oct'23)

The whole business is transferred to digital by me, I am the designer and developer responsible for all of the digital industry at this company, It is an investment-based company so I also have responsible for all the investment calculations, deposits, upsell products, etc. In this company, I refresh my many skills such as - MERN Stack, Stipe, Tailwind, React.js, and Sanity.

❖ MERN Stack developer | Alchimetis - Ontario, Canada

(Sept'22 - March'23)

I worked Remotely on MERN with Powerful technologies such as Redux, building SaaS Applications with CI/CD Pipelines, using cloud services for deployment, solving real-world problems, and using Modern UI Designing kits such as Material, Tailwind CSS, etc.

❖ MERN Stack developer (Intern) | Alchimetis - Ontario, Canada

(June'22 - August'22)

I gained hands-on experience in software design, development, and deployment. With mentorship from senior engineers, I mastered MERN Stack technologies, including CI/CD, Cloud Applications, Firebase, Node.js, GitHub Pages, Linux, Next.js, React.js, etc. This internship was pivotal in shaping my career trajectory.

❖ Accounts Software (Intern) | Akhtar & Hassan Actuaries

(Feb'22 - March'22)

I had done an Internship in Accounts, Knowing about PF, GF, Pension Fund & VPS. I also used accounting software which helped me better understand b/w Accounts and the IT field.

❖ Freelancer | Fiverr & Upwork

(2020 - onwards)

I am working on WordPress, Dot Net, Shopify, and MERN on the freelance platform, to serve clients worldwide, getting real-world exposure to work.

Projects

❖ Open AI Application (Copymatic) | Frontend (MERN)

I design the frontend of an Open AI application to generate the Automatic blog and content, such as Copymatic and Chat Gpt, use Tailwind CSS with glass morphism effects, Mobile Responsive, and eye-catching.

❖ Project Management, SAAS Application | Full Stack (MERN)

I design both frontend and backend using a cloud database (MongoDB), RFQ will generate which will be invited to vendors to get their Quotes, different profile sections for them and the higher Committee, the Data is Authenticated and Safe.

❖ Job Finding | Mobile App (Cross Platform) | React Native

I made the Job Finding app in React Native. Jobs are listed from Rapid API, Users can select and apply for jobs by joining their respective websites from the app.

❖ Blockchain Cryptocurrency App | Web 3.0

I made the Blockchain (Web 3.0) application through which we can send Ethereum to any Blockchain Address, charge the Gas Price, against each transaction, and record all the dealings with a unique gif.

❖ Tons of Web & desktop Applications

I built tons of websites with the passage of time, With Different Programming Languages, and With other Platforms such as using WordPress, Wix, and Shopify and interacted with many databases such as Mongo Db, Firebase, Ms. SQL Server, My SQL, etc.

Education

❖ Muhammad Ali Jinnah University (*Bachelor in Software Engineering*)

❖ All Pakistan Memon Federation (*Diploma in Dot Net & Web development*)

❖ S.M Science Govt College (*2nd Year Engineering*)

❖ CISCO I.T Essentials (*From All Pakistan Memon Federation*)

❖ S.t Paul English High School (*Matriculation*)
