Muhammad **Jibran**

Karachi, Pakistan

(+92)3308138077 | muhammadjibran890@gmail.com | muhammadjibran.netlify.com

Work Experience_____

❖ **MERN Stack developer | Alchimetis (USA based Agency)**   *(July'22 - April'23)*

  I worked Remotely on MERN with Powerful technologies such as Redux, building Saas Applications with CI/CD Pipelines, using cloud services for deployment, solving real-world problems, uses Modern UI Designing kits such as Material, Tailwind CSS, etc.

❖ **Accounts Software (Intern) | Akhtar & Hassan Actuaries**   *(Feb'22 - March'22)*

  I had done an Internship in Accounts, Knowing about PF, GF, Pension Fund & VPS. I also used accounting software which helped me to get a better understanding of b/w Accounts and the IT field.

❖ **Freelancer | Fiverr & Upwork**   *(2020 - onwards)*

  I am working on WordPress, Dot Net, Shopify, and MERN on the freelance platform, to serve clients from all over the world, getting real-world exposure to work.

Projects_____

❖ **Open AI Application (Copymatic) | Frontend (MERN)**
I design the frontend of an Open AI application to generate the Automatic blog and content, such as Copymatic and Chat Gpt, use Tailwind CSS with glass morphism effects, Mobile Responsive, and eye-catchy.

❖ **Project Management, SAAS Application | Full Stack (MERN)**
I design both frontend and backend using a cloud database (MongoDB), RFQ will generate which will be invited to vendors to get their Quotes, different profile sections for them and for the higher Committee, the Data is Authenticated and Safe.

❖ **Job Finding | Mobile App (Cross Platform) | React Native**
 I made the Job Finding app in React Native. Jobs are listed from Rapid API, Users can select and apply for jobs by joining their respective websites from the app.

❖ **Blockchain Cryptocurrency App | Web 3.0**

I made the Blockchain (Web 3.0) application through which we can send Ethereum to any Blockchain Address, charge the Gas Price, against each transaction, and also record all of the transactions with a unique gif.

❖ **Tons of Web & desktop Applications**

I built tons of websites with the passage of time, With Different Programming Languages and With other Platforms such as using WordPress, Wix, and Shopify and interacted with many databases such as Mongo Db, Firebase, Ms SQL Server, My SQL, etc.

Education_____

❖ Muhammad Ali Jinnah University *(Bachelor in Software Engineering)*
❖ All Pakistan Memon Federation *(Diploma in Dot Net & Web development)*
❖ S.M Science Govt College   *(2nd Year Engineering)*
❖ CISCO I.T Essentials   *(From All Pakistan Memon Federation)*

❖ S.t Paul English High School   *(Matriculation)*

Skills_____

React Js/React Native	Next.js	Node Js	Express Js	Mongo Db
Redux	C#	Asp.Net	Python	C++	WordPress
Ms. SQL	MSOffice(ADVANCE)		Javascript	CI/CD

Career Objective_____

Hy! I'm a MERN stack developer with nearly three years of experience crafting innovative solutions using modern web technologies such as Node.js, Express.js, MongoDB, React.js, Next.js, Dot Net, and more.

As a professional developer, I take pride in my ability to create scalable, high-performance web applications that meet the needs of clients and users. My expertise in building robust APIs, integrating third-party services, and designing intuitive user interfaces enables me to deliver results that exceed expectations. I'm passionate about my work and always strive to stay up-to-date with the latest trends and best practices in web development.

You can check out my work on my personal website.
